EduGenie

Brainstorming and Ideation Phase

Project Ideation Report

Prepared for Academic Project / Innovation Activity

1. Introduction

EduGenie is a proposed educational support platform designed to help students learn in a simple, personalized, and engaging way. The brainstorming and ideation phase focuses on identifying student problems and generating practical ideas that can improve learning experiences.

2. Problem Identification

Students may face difficulties such as understanding complex topics, finding suitable learning resources, managing study time, preparing for examinations, and receiving quick clarification for doubts. These challenges motivated the idea of developing an intelligent educational assistant.

3. Brainstorming Process

The brainstorming process was carried out by identifying common student needs and generating possible solutions without initially rejecting ideas. The major focus areas were personalized learning, doubt clarification, study planning, revision, and easy access to educational resources.

4. Ideas Generated

No.	Idea	Purpose
1	AI Doubt Assistant	Provide quick explanations for student doubts
2	Personalized Study Planner	Create organized study schedules
3	Quiz and Practice Module	Support revision through practice
4	Learning Resource Organizer	Collect useful study materials
5	Progress Tracker	Monitor learning progress
6	Exam Preparation Support	Help students prepare systematically

5. Idea Selection

After comparing the generated ideas based on usefulness, feasibility, student needs, and ease of implementation, the concept of an integrated educational assistant was selected. EduGenie combines multiple learning-support features in one platform.

6. Proposed Solution

EduGenie is proposed as a smart learning assistant that can guide students through their academic work. It can provide explanations, organize study activities, support revision, and help students understand difficult concepts through interactive learning.

7. Key Features

- Interactive doubt clarification
- Personalized study planning
- Subject-wise learning support
- Quizzes and practice questions
- Progress monitoring
- Exam preparation assistance
- Simple and student-friendly interface

8. Expected Benefits

EduGenie can make learning more organized and accessible. It may help students save time while searching for learning support, understand topics more clearly, revise systematically, and develop independent learning habits.

9. Conclusion

The brainstorming and ideation phase helped transform common student learning challenges into a practical project concept. EduGenie aims to provide a student-friendly learning environment by bringing useful educational support features together in a single platform.
